3M™ 3000 Series Half Mask Respirators

Compact and lightweight, the 3M 3000 Series offers an economical solution for respiratory protection for a wide range of applications.

The 3M 3000 Series features an elastomeric face seal with either a single organic gas and vapour or combination filter. The comfort of the soft face seal, filter options and the ergonomic product design altogether ensure a user-friendly half mask.

For peace of mind at an affordable price, the 3M 3000 Series Half Mask Respirator is a wise choice.

3M™ 744 retainer		
3M™ 7725 prefilter	EN 14387:2004	Particles P2 R (Reusable)

6-step Fitting Guide:

1 Place the respirator over the nose and mouth, fitting it comfortably on the bridge of the nose.

4 Tighten straps by pulling on ends to achieve a comfortable and secure fit.

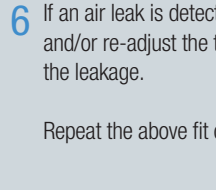

2 Pull the head harness over the crown of the head.

5 Perform a fit check by placing palm of hand over the circular opening of the cartridge, inhale gently. If the facepiece collapses slightly, a proper fit has been achieved.

3 Take a bottom strap in each hand, place the straps at the back of the neck and hook the straps together.

6 If an air leak is detected, reposition the respirator on the face and/or re-adjust the tension of the elastic strap to eliminate the leakage.

Repeat the above fit check.
